- Handled day-to-day invoice management, ensuring timely and accurate vendor payments.
- Maintained effective communication with vendors to resolve invoicing issues and obtain necessary documents.
- Ensured financial records were up-to-date and compliant with organizational standards.
- Maintained accurate bookkeeping aligned with accounting principles and regulatory compliance.

EDUCATION:

Bachelor of Commerce 58%
Bhakta Kavi Narsinh Mehta University

- 2020

PROJECTS:

1. Customer Segmentation & Purchase Behaviour Analysis

<https://github.com/VikramBhagnani/Customer-Segmentation-US-Purchase-Analysis>

- Analyzed 3,900+ customer records to identify purchasing patterns across age, season, and product categories.
- Performed data cleaning and EDA to uncover spending behavior and discount sensitivity
- Built Power BI dashboards to visualize customer segments, category performance, and seasonal trends
- Applied segmentation logic (frequency, spending, demographics) to identify high-value customers
- Generated actionable business insights and recommended discount strategies to improve customer retention and revenue

Skills Applied: EDA, Customer Segmentation, Power BI, Business Insights, Data Cleaning

2. Startup Profit Analysis

<https://github.com/VikramBhagnani/Startup-Profit-Analysis>

- Delivered an end-to-end analytics project, building a regression model to assess business drivers of profitability.
- Created an interactive Power BI dashboard to present insights.
- Applied predictive modelling to identify that R&D spend had the highest ROI.
- Generated client-style deck to communicate insights, enabling strategic investment decisions.

Skills Applied: Regression Analysis, KPI Analysis, Dashboarding.

3. IMDB Movie Analysis

<https://github.com/VikramBhagnani/IMDB-SQL-Movie-Analysis>

- Analyzed movie and director datasets from an IMDB-like relational database using complex SQL queries to answer real-world business questions.
- Performed joins between movie and director tables, applied filtering, aggregations (e.g., COUNT, SUM, AVG), and used GROUP BY, ORDER BY, LIKE, and LIMIT clauses to derive insights such as: (Most bankable and awarded directors, most popular and top-rated movies, Female representation among directors).
- Summarized query results in Excel for interpretation and reporting, demonstrating the ability to extract meaningful insights directly from raw SQL outputs.
- Answered business-driven questions using SQL analysis.

Skills Applied: SQL Querying, Joins, Aggregations, Pattern Matching, Data Interpretation.

4. Sales Performance Analysis (Excel)

<https://github.com/VikramBhagnani/Sales-Performance-Analysis>

- Analyzed 3 years of sales, profit & quantity trends across regions and product categories.
- Performed trend, ranking, correlation, and comparison analysis to identify high-performing segments and loss-making categories.
- Built an interactive Excel dashboard using Pivot Tables & forecasting.
- Provided insights supporting pricing improvement, discount optimization, and growth focus.

Skills Applied: Data Cleaning, Pivot Tables, Trend Analysis, Ranking, Dashboard Design, Visualization.
